

Serial No.: 10/624,666
Atty. Docket No.: D5265

(d:) REMARKS

By the Action, the second in the present application, the Examiner allowed claims 1-4 and rejected claims 5-7 as obvious under 35 U.S.C. 103(a).

Claim 5 have been amended to overcome the art.

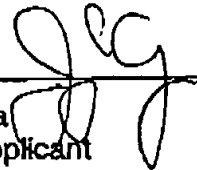

In brief, Claim 5 has been amended to incorporate additional limitations found in claim 1. In particular, the extent of the degree of vertical coverage of forced air issuing from outlet ducts in the dash into a vehicle entry well have been incorporated into the claim. In addition, a source of the forced air and the relationship of that source to the various outlets have been recited.

The remaining dependent claims, 6 and 7, add still further limitations further distinguishing the present invention over the cited references.

Applicant believes the Claims as amended, or newly submitted, are in condition for allowance and respectfully requests favorable action by the Examiner.

Respectfully submitted,
